INSURE AGAINST FIRE!

"DELAYS ARE DANGEROUS!"

THE GEORGIA HOME INS. CO.

OF COLUMBIA, GA.

Incorporated, 1859.

Capital and Assets, over \$600,000.

THE Georgia Home Insurance Company

continues to insure property against loss by fire at reasonable rates.

Many of our most prominent and prudent citizens keep their Dwellings, Merchandise, &c., insured in this favorite Southern Company.

The "Georgia Home" is a good and reliable Company—pays all losses promptly—and is worthy of the confidence and patronage of the people of Edgefield.

Call on the undersigned, and secure a Policy on your Dwelling, and don't postpone this important matter; for fires are daily occurring, and ere the dawn of another day the home of your wife and children may be a heap of smouldering ruins. Insure at once!

REMOVAL.

DESIROUS of extending my business, I have taken the spacious store, No. 176

BROAD STREET, lately occupied by Geo. Weber, where I intend to keep a large stock of WATCHES, fine and medium class of JEWELRY, MUSICAL INSTRUMENTS, and SILVER PLATED WARE, GUNS and PISTOLS.

I have secured, at a high salary, a FIRST-CLASS WATCHMAKER, who will guarantee every watch which he repairs.

In addition to all this, I have a large stock of DRY GOODS, CLOTHING, HATS, BOOTS, SHOES and FANCY ARTICLES, which I will sell as low as any house.

Thanking the public for past patronage, I solicit a continuance of the same.

S. COHEN.

FOUTZ'S

Horse and Cattle Powders.

This preparation, long and favorably known, will thoroughly cleanse the system, and is a sure preventive of all diseases incident to the animal, such as LUNG FEVER, CLAVES, YELLOW WATER, HEAVY COUGHS, BRONCHITIS, FEVER, AND LOSS OF APPETITE AND VITAL ENERGY, &c. Its use improves the wind, increases the appetite, gives smooth and glossy skin, and transforms the miserable animal into a healthy and thriving one.

To keepers of Cows this preparation is invaluable. It is a sure preventive against all diseases incident to the cow, such as MILK FEVER, &c. It has been proven by actual experiment to increase the quantity of milk and cream twenty per cent, and make the butter firm and of the best quality.

It also cures all diseases incident to the calf, such as SCURF, &c., and makes them thrive much faster.

In all diseases of Swine, such as Coughs, Wounds, &c., this medicine is a specific. By putting from one-half a paper to a paper in a barrel will the above disease will be eradicated or entirely prevented. If given in time, a certain preventive and cure for the Hog Cholera.

DAVID E. FOUTZ, Proprietor, BALTIMORE, MD.

For sale by Druggists and Storekeepers throughout the United States, Canada and South America.

For sale at Edgefield by A. A. CLISBY.

FLORENCE

Vinegar! Vinegar!

JUST received two Barrels of choice White Wine and Cider Vinegar.

Win and Wear.

There's no royal road to greatness; Men must ever climb to fame; All the wealth in misers' coffers Wouldn't buy a deathless name.

In a noble goal before you? Would you great achievements bear? Brothers, then, be up and doing! Brothers, you must "Win and Wear."

Toil and labor—never stopping Till you make the prize your own; For you know 'tis constant dropping Wears away the hardest stone.

Never lack sublimed endeavor; Nor mind chafe and despair; If you'd rise above your fellows, Brothers, you must "Win and Wear."

'Tis the lesson nature teaches All throughout her wide domain; As the leaf from which she prunes Is that "Labor leads to Gain."

Moral worth and honest merit—Better crowns than monarchs bear—These you never can inherit, Brothers, you must "Win and Wear."

For the advertiser.

Letter From the Mountains.

WALLHALLA, S. C., Nov. 23, 1872.

MR. EDITOR: The letters of a newspaper correspondent are valuable not for their frequency, but from the amount of matters of interest they may contain. It will be my aim in future to keep this faith in view. When I have nothing of much importance to write, I shall say but little, and endeavor to compress what I do write into as small a compass as possible.

During the last few weeks we have had a forecast of real winter in this elevated region. The wind, blowing from the North-west, has at times been quite cold and keen. The forests upon the mountains around us have donated their coats of russet and brown; and it will not be long before the noble old trees, grim and lonely monarchs of these wild and craggy sentences and scenes, will have to stand with bare and uncovered heads and branches in the keen and wintry blasts.

I remember reading somewhere of an English lady who was once enamored with the various colors and tints of an American forest in Autumn, that she had a quantity of leaves of the richest and most beautiful dyes and hues gathered, and made a splendid ball dress of them, which she exhibited at a party on her return home to the no little wonder and admiration of her friends in "merry old England." I have mentioned this merely to say, that if our English sister were here now in the picturesque dells and glens of these part-colored forests, where the sylvan goddess seems to have erected her most beautiful and fanciful temples and shrines, she might gratify her taste for the infinitely and exquisite exhibitions of nature's aesthetics to the fullest extent. But we must leave the fair domain of the beautiful and poetical in nature, the study and contemplation of which is so well calculated to elevate and ennoble human nature, and turn to the practical and bustling world of man around us, for the age in which we live, with all its boasted progress and achievements, is intensely material and utilitarian.

As winter approaches, the merchants of Wallhalla are beginning to drive a brisk and lively trade.

On the week-end Sunday, our streets are enlivened with the presence of wagons and carts, and other non-descript vehicles of locomotion, loaded with cotton, grain, apples, cabbage, chautaus, poultry, and other products of field or forest. The other evening a wagon came into town from North Carolina, and among other articles, it contained a large ham of meat, with the fat on.

The paw was left, I suppose, to show the size of the animal, and to convince all unbelieveing Thonages that the meat was genuine, not pork, which it very much resembles, but the ham of a real "bruin." But I learn that the bringing of bear meat here for sale is by no means an unusual occurrence. The animals abound in the mountainous country North of this town, and in the Western section of North Carolina, which is partly inhabited by the remnants of the Cherokee Indians. The hunters are mostly taken by the hunters and trappers of that region. Col. Van Deviere, an intelligent merchant of Wallhalla, informed me that he has purchased quite a number of large bear skins in one season. The meat is so plentiful and so cheap, that it is sold for much like sturgeon—you may obtain as much into your stomach as it will hold, and it will not hurt you.

A man of my name, I am sorry to inform you that Mr. Almy, who lived in the West Union part of this place has returned to Edgefield county. Newberry College loses a student by his removal, as his son Benjamin, a promising youth, was in attendance at our Institution. Some of your readers may perhaps remember the beautiful country seat of Col. Grisham, a place called "Grassy Knob," about six miles North of Wallhalla, at the foot of Poor Mountain. It is now the property of Dr. Yarbrough, formerly of Edgefield county. In company with the doctor I have visited this charming spot several times. There is a fine and productive farm adjoining the place. The dwelling was originally built, and the grounds laid out and arranged, (which is very tastefully done) by a wealthy low-country man who summered there. The place is easy and well sheltered, and the scenery around it is romantic and beautiful. As a young lady would say, I dearly love the mountains, and if I had "plenty of money and no poor kin," I would like to reside at such a place as "Grassy Knob," and surround myself with a circle of choice friends, the balance of the world might "wag for me." I could then afford to write you letters that would be letters. But I reckon it is best that there are often "lifers" in the way of our desires, as any one who is wise to be content with our lot. As we are, we are.

MOLTKE.

MARRIAGE AND CELIBACY.—Those dry but useful people who delight in statistics have been investigating the effect of marriage and celibacy on mortality. They have demonstrated to their satisfaction the beneficial effect of marriage upon longevity. The last person who has devoted his attention to this subject is M. Bertillon. His statistics cover the States of France, Holland and Belgium. According to M. Bertillon, between the ages of 20 and 35, out of 1,000 married men there are 6 deaths; out of 1,000 bachelors 10 deaths, and out of 1,000 widowers 22 deaths. Between 30 and 35 the deaths in the same number are: Married men 7, bachelors 11 and widowers 17. Between 35 and 40 years of age the mortality per 1,000 is: Married men 1, bachelors 13, and widowers 17. Continuing these calculations through different series of years, the advantage on the score of longevity is all in favor of the married man.

Originally the term of human life was a thousand years; but that was before there were doctors.

Peace.

The civilized world is in a state of profound peace. Few words but what an intensity of meaning. The great nations armed with vast power instead of tearing and rending each other, are engaged in advancing the science and art in aiding material progress by establishing a common advantageous to all. How long this beneficent state of affairs will continue, the future only can determine. But while the peace of the world is so perfect, the best interests of mankind, to the development of those resources which add to the comfort and happiness of the inhabitants of the globe, to this object philanthropists, and men of genius and science seem to be bending all their energies. New and useful inventions spring into being every day. Projects are devised and perfected for the amelioration of the condition of the laboring classes. The Temple of Janus closed, every energy is bent to give impetus to the varied industries of the world. The people are prospering, and the peace of the world is so perfect, the best interests of mankind, to the development of those resources which add to the comfort and happiness of the inhabitants of the globe, to this object philanthropists, and men of genius and science seem to be bending all their energies. New and useful inventions spring into being every day. Projects are devised and perfected for the amelioration of the condition of the laboring classes. The Temple of Janus closed, every energy is bent to give impetus to the varied industries of the world. The people are prospering, and the peace of the world is so perfect, the best interests of mankind, to the development of those resources which add to the comfort and happiness of the inhabitants of the globe, to this object philanthropists, and men of genius and science seem to be bending all their energies.
